A True Dental Lab Experience with CAD/CAM Digital Technology

Digitalization has changed the landscape of our industry and exciting new processes and methods continue to evolve.

This presentation will discuss the digital dental laboratory, from concept to full implementation and the inherent problems encountered therein.

Mark Rotsaert will share his experiences of the past 10 years {in his dental lab} and what he believes is the future of the digital industry.

Mark Rotsaert's father, Henri Rotsaert, established Rotsaert Dental Laboratory in Hamilton, Ontario more than fifty years ago. The lab continues to be a formidable business today with Mark and his siblings at the helm.

Mark has been in the dental industry all his life and has been involved in the fabrication of digital dental prosthesis for more than 20 years. Like his father, he always looks for new alternatives in the digital world. Mark has knowledge of every system launched in the past decades. In 2014 after extensive research, Emerald Dental Works joined with exocad to launch EmCad Design Solutions and has also teamed with Carestream incorporating their intra oral scanner.

Cad/Cam technology offers Dentists and Labs more solutions for their patients

Given the demanding challenges of offering patients/dentists with optimal dental solutions, the introduction of Cad/Cam has made these options more accessible to most if not all Dental Laboratories. Having reputable Cad/Cam outsource partners can help the Lab keep costs down yet still be able to offer their dentists up to date and ever changing solutions. In this presentation I will address various workflows available and look at solutions available for some of those challenging cases.

Andreas Klie, Regional Sales Director, Ontario

Andreas is a Registered Dental Technologist with over 30 years of experience in the dental field. Andreas graduated from Technikon School of Dental Technology in South Africa in 1986. He founded La Lucia Dental Laboratory in 1991 and operated it until he came to Canada in 2001. In 2005, he became an RDT in Ontario. Andreas plays a major role in Panthera Dental's strategy to incorporate more technical guides and articles into its portfolio. His experience as a dental technologist, combined with his field experience, allows him to offer customers precise and detailed solutions on a more technical level.

Cast Patials: Yesterday, Today, and Tomorrow

This lecture will focus on the evolution of cast partials and how today we have a different experience than what we experienced in the past. Today we view partial denture design and fabrication as an art form. We will look how to deliver a lightweight, durable casting that's both functional and comfortable for your patient to wear. Cast partials should include the most aesthetically pleasing denture teeth available to give you the mix of function, comfort, and beauty seldom seen.

Alex Tenzer is backed by over 20+ years of German craftsmanship, he applies this knowledge to his position as Cast Partial Specialists at Baluke Dental Studios. His disciplined systematic approach ensures that every cast partial is consistent of the highest quality. He prides himself on designing each partial himself, providing consistent and predictable results.

“Can You Make Me Something to Stop My Snoring?” Protect Your Patient – Protect yourself

As oral appliance therapy becomes a more recognized treatment for sleep disordered breathing, (snoring and obstructive sleep apnea) dentist practitioners often attempt treatment without being aware of the pitfalls, both legally and clinically, which they may encounter.

This presentation will outline the benefits and consequences of treating sleep disordered breathing and make attendees aware of the proper treatment protocols to protect both your patient and yourself.

Dr. Les Priemer graduated from the University of Toronto, faculty of Dentistry in 1972. He is a member of the American Academy of Dental sleep Medicine, (having served on its Education and Curriculum committee) and is an

Emeritus member of the American Academy of Sleep Medicine. He is a Diplomat of the American Board of Dental sleep Medicine and sat on its certification committee in 2003-2004. He consults with a number of sleep diagnostic centers and has given numerous presentations to sleep and general hospital rounds, physicians, respiratory technicians and dentists. He has presented to the Ontario Dental Association Spring Meeting and has authored articles on sleep disordered breathing for the Ontario Dental Association Journal and the Canadian Dental Protection Association.

He is also currently an instructor for the University of Toronto Sleep Medicine Program.

CBCT Guided Full Arch Immediate Reconstruction: From Surgery to Prosthetics

This new technique for guided reconstruction has not only changed, but also will continue to change the way we plan and treat implant patients going into the future. This lecture will discuss how we can now use digital technology to integrate the surgical, restorative, and laboratory disciplines, in order to have a much more accurate, efficient and seamless result in immediate implant reconstruction.

Dr. Allen Aptekar, B.Sc., DMD studied at the University of Toronto, earning his Bachelors of Science degree in Biology. He received his Doctor of Dental Medicine degree with distinction at the University of Saskatchewan College Of Dentistry. Dr. Aptekar then completed a one year hospital residency at Sunnybrook Health Sciences Center and the University of Toronto. He has authored and co-authored several articles in refereed professional dental journals, and is a lecturer in dental implant procedures for dentists and denturists. He practices in the greater Toronto area, with a special interest and focus on dental implantology.
